# Setting Up Basic UIs with App Navigation

Catalin Stefan

🐦 @catalin_ste

in in/catalins

Overview

- Set up app navigation foundations

- Create dummy screen composables

- Set up scaffolding

- Implement bottom navigation

Jetpack Navigation

Navigation component allows us to:

•Manage transitions between screen

•Manage backstack

Scaffold allows us to:

•Implement bottom navigation

•Move between the two main sections of the app

Summary

- Navigation fundamentals

- Composable placeholders

- Scaffold and BottomNavigation

- Vector assets

Implementing Retrofit and Hilt Dependency Injection
